

Prof. Gray

Boston June 20. 1846.

My dear Sir,

Dr. Boott desires me to say to you that Bentham is in London en route for Germany, Petersburg, Moscow, Constantinople, Greece & Italy with his wife - He has just finished the Libanotes for DeCandolle's prodrromus - He returns to England next summer.

In your hurried call the other morning, I had hardly time to thank you for what you are doing for me -

You may consider me as subscribing for two more copies of your forthcoming Genera if you can dispose of them to similar advantage -

If you will let me know when Dr. Torrey comes - or I will call upon him - If it should be after 10th July I shall be at Beverly with my family - but my address will still be here -

I am

Yrs very truly

A. S. Howell
